

COGAN ADVANTAGES

- Manufacturing Since 1901
- Hybrid Design: Combines the advantages of long span capability using structural I-beams and the increased efficiency of the light weight channel design.
- 3-D CAD
- P.E. stamped drawings.
- CNC Precision Manufacturing: Eliminates the human error, ensures accurate hole positions and notching that achieves the accuracy of a “square” design. CNC Precision is applied to Mezzanine; channels, joists, stair stringers and treads.
- Powder Coated “Tough” paint finish.
- On-line “Live” Meetings: Verify Approval drawings with the customer, dealer, installer and Cogan engineer collectively to ensure accuracy through increased communication. Can be viewed collectively via multiple locations.
- 24/7 installation and engineering support, including weekends.
- On site consultation and service.
- Lifetime Structural Warranty.
